SPIRITS HELPRO HIM TO MAKE HIS WILL. FIRITS HELPED HIM TO MAKE HIS WILL.
William Henry Livingstone, who died in Newark on
February 4, 1888, possessed property in this city worth
The Cho,000. A will dated January 14, 1887, bequested
all his property to his daughter Liliam Belle. The
daughter was to support Mrs. Williams, the mother of the
testator's dead wife. Mrs. Mary II Middleditch, the
testator's dister, with seven nieces and two nephows, began
a contest of the will on the ground of undue influence and a contest of the will on the ground of unaue influence and the trial of the case was begun-in the Orphan's Court, at Newark, yesterday. In his opening, Francis E. Marah said that he proposed to show that there was a conspiracy among the Williamses to influence Livingstone, whose and had become weakened by the excessive use of optum and liquor; that on one occasion he was taken by Mrs. Williams to a spiritualistic medium and there persuaded that he was conversing with his dead wife, who admontabled him to "take good care of manua as long as abe lives." The spirit of an infant daughter was also conjused up to cay: "Papa, paps, oh, papa, always be good to grandma!" When Livingstone died, Mr. March alleged,

the fact was concealed from his sister. Charles W. Plyer, a New York insurance agent, testified that Livingstone told him that he had been to see a spiritualistic medium in Forty-sixth-st., this city, and that his wife had advised to the beauty of the second of the se him to will his property so that none of his relatives should he will his property so that none of his relatives should get it. Other witnesses testified to the peculiar delusions of Mr. Livingstone. The case will be continued to-day.

MR. GOULD WILL NOT GO WEST.

NO INSPECTION OF M., K. & T. JUST NOW. THE DIRECTORS RATIFY THE ABROGATION OF THE

A special meeting of the directors of the Missouri, Kansas and Texas Railroad was held yesterday and the acts of the executive committee, including the ab-rogation of the lease of the International and Great Northern, were approved. It was rumored in Wall Street that Mr. Gould would start immediately on an inspection of the railroads of the Southwestern system, and the inference was quickly drawn that his departure meant a receivership for the Missouri, Kansas and Texas property. It is uncertain whether the fact that Mr. Gould has no present intention of going West to "grow up with the country" would have checked the downward movement of stocks. The Missouri, Kansas and Texas committee suggested that Mr. Gould might be intending a receivership, but was nable to give a reason why Mr. Gould's presence

It would appear ordinarily that several members of the Southwestern system might be placed in the hands of receivers, and the principal question seems to be whether Mr. Could or the real owners should have the right of nomination. The annual meeting of the Missouri, Kansas and Texas will be held on May 16, and there is no doubt that the stockholders will be able to elect a new board of directors. By the recent cancellation of the lease of the International and Great Northern, the new managers of the Missouri, Kansas and Texas will have a railroad system without important connections at either end.

Jay Gould said yesterday in reply to particular inquiries: "The Street rumors that I shall start for the West to-night are not correct. I hope to make an inspection of the Southwestern system in a short time. but I cannot say when I shall leave the city. I pre in three or four days. The score was as follows: sume that the new management of the Missouri, Kansas and Texas will be able to extract blood from turnip. I have not been able to do so."

About the lease of the International and Great Northern, which has been legally annulled, Mr. Gould said: "I had heard nothing about these things until after my return from Europe. I discovered then that the International was spending more than its gross earnings, and in the first quarter the excess of expenditure was \$141,277. I asked the reason for thi condition and learned for the first time that the Attorney-General of Texas had begun a suit against the | Jersey City . . . 1 5 0 1 2 3 0 0 0 -12 | Bluechamton . . 0 0 0 6 0 0 0 0 0 -6 company. His complaint about the physical condition of the road was being remedled as fast as possible and a good deal of money was spent on improvements. The suit comes up in June, and aside from this point I understand that the laws of Texas are very strict, not only about the consolidation of competing lines, but also the interchange of business by connecting roads. If the suit by the State should be successful, the stock of the International and Great Northern would be absolutely worthless. My efforts recently have been to preserve the rights of the shareholders."

In regard to the rumors about the possible default in the payment of the June interest on Missouri, Kansas and Texas bonds, Mr. Gould intimated that the question was one for the proposed new management and not for him. "The new owners will find the property in good condition," he remarked, "but they will have to say what they will do with it. The territory has been divided closely and with the building of every new line rates for transportation have been lowered. The new owners will be hampered about connections. The Missouri Pacific has given the Kansas and Texas much more business than it has redividends when the other company has not earned its first charges, it is only necessary to say that the fixed payments of the Missouri, Kansas and Texas are larger per mile than those of the Missouri Pacific, with 10 per cent dividends added. The Missouri Pacific is singularly free frem positive guarantees, and I do not know of a property that at the moment is in a snugger shape." inquiry why the Missourt Pacific has been able to pay

A POOR BALL GAME IN JERSEY CITY.

About 1,000 people saw the poorest apology for a base-ball game ever seen in this neighborhood at Oakland Park, Jersey City, yesterday afternoon. HARVARD DEFEATS PRINCETON. THE FIRST GAME AT CAMBRIDGE AN EASY VICTORY FOR THE CRIMSON.

Cambridge, Mass., May 7 (Special).—Harvard won a game from Princeton to-day by 2 score of 9 to 3 in a very unsatisfactory manner. King occupied the pitcher's hox for the orange and black and Harvard got but four hits. with a total of six, off his pitching. This was accounted for by King's being so wild after the second inning that the ball rarely came near the plate. King gave seven Harvard players bases on bells and nade three wild Harvard players bases on bells and nade three wild pitches, two of which let in runs. Princeton played a miserable fielding game at critical moments. Harvard did not but strongly, but made only three errors in fielding.

Bates, her untried Freshman pitcher, played a fine game, striking out fifteen Princeton hitters and giving but one base on balls. Eight hits, all single and scattered, were made off his pitching. Two were scratches and three others were gifts. Bates showed a tendency to become over-confident when he had two strikes on a batsman, and let up too much in his speed. Not a run would have been let up too much in his speed. Not a run would have been made by either nine with proper fielding. The score was:

method for preventing desertions I' was asked of an army officer.

"In a report of the Secretary of War for the present year one of our generals recommends that every man who enters the United States service should be tattooed at some place on his arm with the letters, 'U. S.' In order that there may be no attema about this, it is suggested that the tattooing be extended to the officers as well as to the men. If this was done I think it would have a good effect, aithough there is a rood deal of opposition to the proposal in the army. Some officers assert that they would rever a sood deal of opposition to the proposal in the army. Some officers assert that they would refer from the service before permitting the tattooers to do their work. But, in my opinion, there are very few officers who would throw up their commissions for a thing of this kind, especially when it would be so general as to prevent the cry of degradation. It would certainly mark every man who applied for enlistment so well that we fould tell in a moment whether he ever served in the army before, and would absolutely prevent the re-enlistment of the men who once desert."
